HAUTE VALEUR ENVIRONNEMENTALE

This old vineyard, which dates back to the 15th century, is located on a clay-limestone coast, a few kilometers northwest of Saint-Emilion. The vineyard of nearly 40 ha, straddling the two Pulesse-Saint-Emilion and Montagne-Saint-Emilion appellations, has benefited in recent years from innovative transformations to bring grapes to maturity and optimal quality: increased surfacefoliar, stripping, clarification, reasoned protection. The care brought to the quality of the grape continues during the vinifications during which the sorted harvest is conveyed in the small thermo-regulated tanks of the restored and enlarged cellar in 1999. Vinifications are done in separate lots and this individuality will be kept all atLong vinifications and farming in barrels.
