HAUTE VALEUR ENVIRONNEMENTALE

A real Eden garden of 8 hectares grouped, the Château du Paradis, is located on a magnificent rump of bass.This mixture of gravel, clay and sands carried by the Dordogne accumulates and reflects heat during the maturation of the grapes, thus promoting the concentration, complexity and aromatic finesse of wines.The development of wine is carried out in barrels, the marriage of wood and wine during alcoholic fermentation is thus more intimate and harmonious.This technique makes it possible to split the harvest more precisely and to make an intra-parcel selection.
