### AVERAGE AGE OF THE VINES

30

## — Winery

### HARVEST

Mechanical

### TYPICAL STORAGE

Stainless steel

## — Environmental certifications

HAUTE VALEUR ENVIRONNEMENTALE

Installation in June 2019 at the age of 22 in Lussac. Area of 9 hectares of vines. The southern exposed vineyard benefits from optimum sunshine as well as perfect maturation of the fruit which is made late. Unique terroir which allows slow maturations and which induce interesting aromatic pallets. 40% Merlot / 30% Cabernet Sauvignon / 30% Cabernet Franc. Mechanical and traditional harvest. Inputs are limited to the bare minimum, the vinification process is as less energy -consuming as possible. Stainless steel bowl from 50 to 300 hectoliters. Tasting note of the oenologist Mr. Matthieu Rey: "A little gem inseparable from the love that Paul has to his terroir. An intimate bottle, with a purple and dark dress, where the nose full of black fruit turns out to be your best lover. The mouth remains faithful to the marriage of silky tannins and warm aromas from cherry to brandy. A faithful companion who will delight the most in love amateurs »
